

NSTN Announces Unlimited Batching

April 25, 2005

Garland, TX – Coupled with the October 2004 launch of UNLIMITED online searches, NSTN is proud to announce the launch their newest product – UNLIMITED BATCHING!

This new feature in the NSTN suite allows clients to run unlimited batches through the N-Tel and N-Search products. Multiple batches may be sent each month for one low price. This process takes the headaches out of worrying about monthly expenses, allows for more freedom with budgeting, while returning quality data at unbeatable pricing. NSTN processes each batch through an array of sources to give as many results as possible without compromising accuracy.

NSTN product lines:

N-Ployment Plus™

N-Ployment provides employment verification access (interactive/or batch). Driven by social security number, N-Ployment Plus is designed to offer access to both current and aged employment information.

N-Tel™

NSTN's national directory assistance service bridges the gap for companies that expect real-time information. Via our interactive site or our precise algorithms for batch, NSTN offers our clients the ability to search current directory assistance databases of all the Regional Bell Operating Compa-

nies. We provide real-time, instant access to over 130 million U.S. residential and business listings.

N-Search™

N-Search provides Internet access to over a billion current and historical records. The service allows users to browse through these records instantly. With as little information as a Social Security number, users will have access to names, telephone numbers, and current address information. This information can be vital in tracking down skips, debtors, relatives, neighbors, or associates. Statistics have shown the N-Search product is supplying not only updated address information, but also, in some cases, NON PUBLISHED listings !!!!

N-Screen™

Bankruptcy and Deceased screenings, available in batch or as part of the unlimited online offering. These 2 searches afford clients the ability to screen out bankrupt or deceased accounts up front, saving time in the long run.

N-Service™

For our clients who still wish to have access to traditional dialed directory assistance, NSTN provides N-Service. Clients can now slash their directory assistance costs, dedicate internal lines to the NSTN N-Service, and still continue receiving operator-assisted directory assistance calls.

About NSTN

NSTN (www.nstn.net) was founded as a skip trace company offering locating services to the collection industry. It became apparent that there were limited services that effectively provided insight and understanding to the collection industry. Nothing beats experience.

NSTN hires from the collection and financial industry. NSTN clients can expect over 40 years of hands-on industry knowledge and experience. By understanding the challenges faced by the industry, NSTN is able to offer solutions and assist with recommendations to improve operational efficiency. Being able to effectively communicate with a knowledgeable professional pays huge dividends.

NSTN provides top-notch data solutions and strongly promotes the responsible use of information, adhering to strict standards regarding the use and dissemination of personal information.

NSTN continues watching the market, always looking for ways to improve the job of collections.
