## NSTN Launches New Unlimited N-Ployment Searches

March 13, 2006

NSTN announces the launch of its new online employment service.

NSTN clients will now have unlimited search capabilities and access to this new skip-tracing service, encompassing over 30 million records on employees across the United States. The search will give users access to an array of information such as employee name, title, company address, company phone number, e-mail address, and company website. The search will also scan the database and return other potential employees working at the same company.

Customers opting for the new N-Ployment™ service can sign up for 6 months for only \$125 per user/per month for UNLIMITED access. By choosing the N-Ployment™ service in conjunction with the N-35 service (normally a \$35 value), users gain UNLIMITED access to both systems for ONLY \$150 per user/per month. If you opt for a 12 month contract, the N-35 service will be added at no additional charge, and new users will have UNLIMITED access to all online searches for only \$125 per user, per month!

The N35 service allows users access to the NSTN N-Tel and N-Search databases. N-Tel provides access to the millions of telephone records that are added, deleted or amended within the directory assistance databases of all the Regional Bell Operating Companies. NSTN provides real-time, instant access to over 130 million U.S. residential and business listings. The N-Search database provides access to over 1 billion current and historical records, allowing users to browse through these records instantly. With as little information as a Social Security number, users will have access to names, telephone numbers, and current and historical address information. Relatives may also be obtained via the “potential family” links. This information can be vital in tracking down skips, debtors, relatives, neighbors, or associates. Statistics have also shown the N-Search product is supplying NON PUBLISHED listings in some cases!

### **About NSTN**

NSTN has been a trusted source and a leading provider of information. Through the identification, retrieval, storage, analysis and delivery of data, NSTN serves the information needs of businesses of all sizes and industry. NSTN keeps abreast of the is-

ues and trends, while building and sustaining long-term relationships through understanding its customers' needs. We respond effectively with products and services that reflect changing industry concerns and dynamics. In addition, NSTN strongly promotes the responsible use of information (GLBA compliant), adhering to strict standards regarding the use and dissemination of personal information.
